week-8

JX-Ma

2024/9/28

1 INTORDUCE

This week, we mainly measured the time of 7 CUDNN algorithms in batch size 512, and then modified last week's graph about TFLOPS. Afterwards, I went to learn about the Winograd algorithm and its implementation.

2 experiment

The modified graph from last week and the time required for the 7 CUDNN algorithms are shown below:

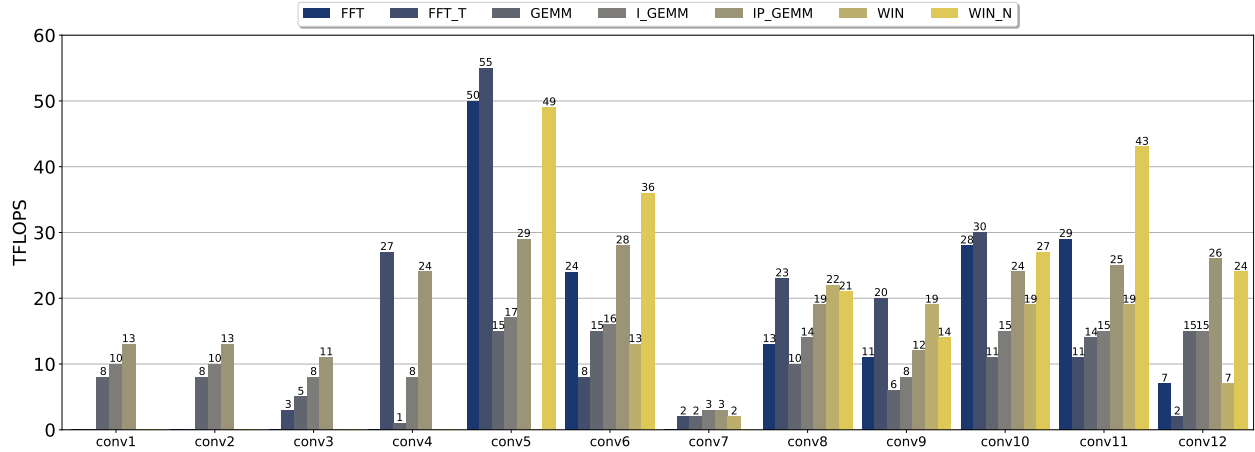

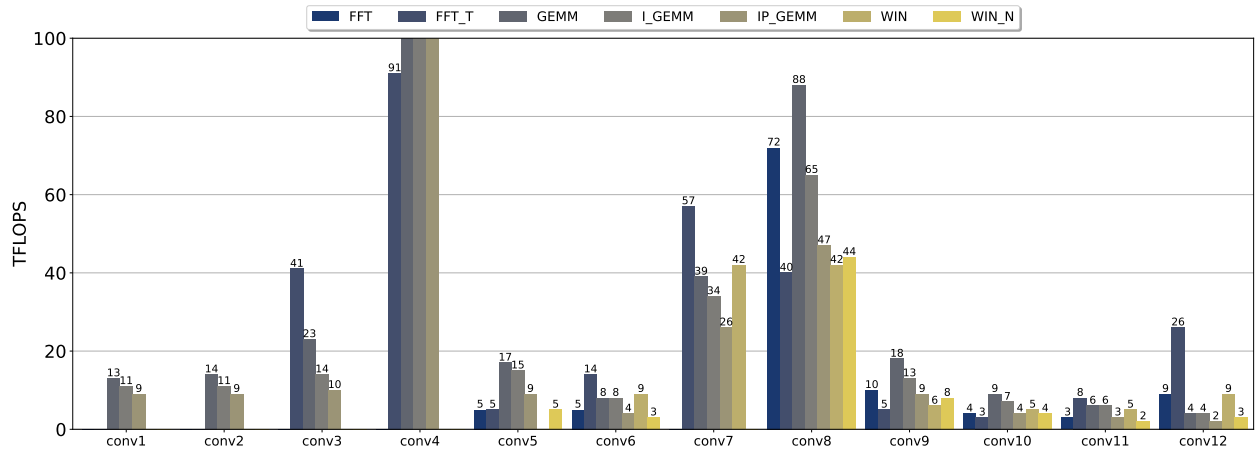

图 1: cudnn algo of tflops and batch is 512

图 2: cudnn algo of time and batch is 512
